-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Rossi.

Regarding claim 1, Rossi discloses a life saving device comprising of a control module 18, a switch 16 or sensing pad in the child seat which will make contact when the child is in the seat, and a wiring harness 20 connecting the seat sensing switch/pad to the control module and subsequently to the vehicle's horn 40 and lighting systems 42 (column 2, lines 5-55, and col. 3, lines 30-55).

Regarding claim 2, Rossi discloses the device being powered by the vehicle's 12- volt electrical system when the vehicle is operating and by the battery 19 when the vehicle is parked/engine not operating (col. 2, lines 5-55).

Regarding claim 3, Rossi clearly discloses two modes of operation.

Regarding claim 4, Rossi discloses the sensing switch/pad 16 detecting when a child is in the seat (col. 2, line 5-30).

Regarding claim 6, Rossi discloses a built-in temperature sensor 28 sending a signal to the vehicle's horn and lighting systems causing intermittent sounding of the horn and flashing of the lights (figure 1, col. 4, lines 48-55).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rossi in view of Ando.

Regarding claims 5 and 7, Rossi discloses all the claimed subject matter as set forth above in the rejection of claim 1, and further discloses the control module comprising an internal temperature sensor 28, power on indicator light, reset button (reset switch, figure 1), but does not disclose a timer. Ando teaches the use of a timer 10 and a door 9. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to include a timer to the device of Rossi as taught by Ando for the purpose of starting a timer when the driver's door is opened.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Thornton, Burgess, Edwards, and Viksnins disclose child alert systems for automobiles.
